

LS 2400 System Does more. Costs less.

The LS 2400 system is a low cost wander system that provides resident ID, loiter and door-ajar monitoring, low tag battery and several more alerts without the need for a computer. It's designed to be a fully functional dedicated system, or customized to integrate to your facilities specific needs. The LS system can provide resident ID and reporting capabilities at the door or nurse's station with the optional LCD display(s). It also uses a wider RF range that minimizes the need for an extra antenna for double door applications. The system is easy to use and can be installed and serviced by your maintenance personnel.

*Optional display panel
for nurse's station*

*The LS 2400 controller
can be used for single or
double door applications*

LS 2400 System Wander Management Solution

Features of the LS 2400 with display include:
